

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re REISSUE CONTINUATION PATENT APPLICATION of

GATTO, et al.

Group Art Unit: 1721

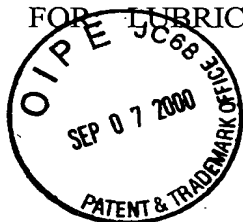

Appln. No.: 09/604,285

Examiner: Margaret Medley

Filed: June 23, 2000

FOR LUBRICANT CONTAINING...DIARYLAMINE

September 7, 2000

INFORMATION DISCLOSURE STATEMENT

Hon. Commissioner of Patents
and Trademarks
Washington, D.C. 20231

RECEIVED
SEP 12 2000
GROUP 1700

Sir:

The Examiner's attention is respectfully directed to the documents enclosed herewith.

The information in the documents has been cited to the Examiner in the parent reissue application. It is believed that the Examiner has independently reviewed and studied this information on the merits in the parent reissue application. Accordingly, it is respectfully suggested that the information disclosed herewith does not raise any new issue.

First, attached is a copy of U.S. Patent No. 4,320,420 to White. In the White patent, about 0.2 to 4.0 weight percent of sulfurized polyolefin antioxidant in combination with certain specified ingredients is disclosed. The White patent discloses to use formulations and additive packages "containing synergistic amounts of sulfurized polyolefin antioxidants..." (emphasis added). The White patent further states that "oxidation stability cannot be achieved by merely adding more biphenyl amine."

Second, attached is a copy of U.S. Patent No. 4,394,279 to de Vries. The de Vries patent discloses antioxidant combinations of sulfur containing molybdenum complexes. This disclosure which is replete with directions to use sulfur containing molybdenum complexes was cited in the parent reissue application. It is thought that the sulfur is active sulfur per this reference. Thus, the directions to use active sulfur containing molybdenum compounds teach

away from the present inventions.

Third, attached is a two-page technical data sheet for a product called Molyvan[®] 822 from R.T. Vanderbilt Company, Inc. The Technical Data Sheets state that "MOLYVAN 822 is a unique molybdenum-sulfur combination in oil-soluble form." It has been alleged by a third party, R.T. Vanderbilt Company, Inc., that the document was published in April 1986. The Molyvan[®] 822 Technical Data Sheets teach away from the present inventions.

Fourth, attached is a copy of "Vanderbilt Lubricating Additives" Technical Bulletin 941, from the R.T. Vanderbilt Company, Inc. also refers to the Molyvan[®] 822 product as having an undisclosed proprietary formula. A third party, the R.T. Vanderbilt Company, Inc., has recently alleged that the designation "PD694" on the last page, at right-hand corner means published June 1994. The unknown, and thus undisclosed formulas, would not have suggested the present inventions.

Fifth, attached is a copy of International Application (WIPO) published under the PCT as PCT WO95/07963 to Shaub has been cited in foreign patent prosecution. This document discloses active sulfur containing molybdenum compounds. The Molyvan[®] 822 brand product is disclosed at page 4 of the Shaub PCT '963 publication.

Sixth, a copy of EP 0696636 A1 (February 14, 1999) is enclosed.

Seventh, a copy of UK Patent Application 2,097,422 A November 3, 1982) is enclosed. It has the same first named inventor of U.S. Patent No. 4,394,279, which was of record during the original patent prosecution, but they do not appear to be patent family members. Therefore, the UK document is enclosed herewith for the Examiner's independent review and consideration to complete the record.

Eighth, a copy of U.S. Patent No. 4,648,985 is enclosed. It was cited in the original patent prosecution and in the parent reissue application. The Examples refer to copper octoate and copper dithio carbamate which teach away from the present inventions.

Ninth, the October 15, 1999 Information Disclosure Statement in the parent case cited International Applications: PCT WO95/07962, PCT WO/95/07966, and PCT WO/95/27022. A copy of each is enclosed.

Tenth, Patent No. 4,822,857, copy attached, was cited in the parent reissue application and was of record in the original patent prosecution.

Eleventh, the Examiner has previously confirmed in the parent reissue application that the references of record in the original patent prosecution were again considered as seen from the attached PTOL 892 forms from the parent reissue application showing the Examiner's hand-written notations.

Twelfth, a copy of the available signed PTO 1449 form(s) from the parent application is (are) attached hereto.

This Information Disclosure Statement is being filed concurrently with the reissue continuation application. A petition pursuant to 37 C.F.R. 1.97 is therefore not necessary. However, if the Examiner determines that there is a deficiency or defect in this Information Disclosure Statement, please contact Applicants' representative and allow such additional time as necessary to correct any deficiency or defect.

The Examiner is requested to independently and carefully review and study the materials disclosed herewith, and to confirm that independent careful review and study by returning a signed and dated PTO-1449 Form(s) in accordance with MPEP 609.

Respectfully submitted,

PILLSBURY MADISON & SUTRO LLP
